Sahara S500, 12-Volt

An automatic-switch bilge pump is a requirement for boats with sleeping accommodations, but is a great addition for any boat. The Sahara has everything contained in one compact unit: pump, wire, seals, strainer, and mercury-free float switch. It's easy to install in tight spaces. Pumps include 36" length tinned copper wire.

S500 has plenty of pumping power for most jobs at 500 GPH* at 3.3' head. Draws only 1.5-amps at 12-volts.

**Listed GPH is measured at design voltage of 12-volts.*
