DESCRIPTION

Bring new life to an older but still good Edson #335 & #336 Pedestal with this complete Rebuild Kit. Edson's #314-335 Pedestal Rebuild Kit replaces all of the important moving parts that will make your pedestal run smoothly again.

The steerer shaft needle bearings have a +/- 20 year lifespan assuming proper maintenance, and worn needle bearings result in roughness, noise, and binding. Keep your system working like new with a Pedestal Rebuild Kit.
